Lester's image of the Hawaii volcano eruption

Jane Goodall died in late 2025. As I had seen her speak twice and had an interesting discussion with her after the talk, so I thought it appropriate to do a stamp.

However NZ Post refused to do the stamp, stating that I needed the direct permission of her family. So I went in search of a good chimpanzee picture that did not have © problems.

I wrote to a well known Swiss Photographer and gained his permission to use his picture. If you don't ask ...

Member Lester has made many variations of this image. It is his definitive for local post.

Another Christchurch local did this one for an event at Ferrymead Transport Park. This was a surprise when he used all 50 stamps on covers.

Yes the first New Zealander in space. ...and yes Mark did change his name to Mark Rocket.

This brought some special advertising interest for a maker of a 'special' type of peanut butter that was thence available in similar packaging.

Self adhesive format.

Gummed format

As an amazing undertaking, Mike of Christchurch has just about created the complete Arms series. There have been many interesting revenues as well.

Mike has also been doing a special remembrance stamp each ANZAC Day for many years.

Dave Butcher, of Auckland, has been producing Personalised stamps since they started [2019] and many year before as CALs.

Each year his character 'Mr Kiwi' is attending a special sporting event with an appropriate sporting uniform.

In 2025 Mr Kiwi went to the Ukraine to help. The colours of the Ukraine Flag are in the background

The rarer first print [only 1 sheet of 50] has a yellow fern on the uniform

The much more common second print has the usual black fern on the uniform.

Julia Kannewischer is a dancer and yoga teacher, who was born and raised in Switzerland. She has been developing PROJECT EPHEMERIS, which started in January 2019 as a series of daily poetry and improvised video performance. Each day the video is about 1 minute in length and a very creative use of split screens. She has done over 2100 videos in 7 years.
