VOLUME XXIX

NUMBER 8

MARCH 1992

## N.Z. NOTES AND COMMENT

By Colin Hamilton

Mr. E.W. Leppard of London has shown me a used copy of the King George V 1/- value apparently printed in a uniform deep sepia colour.

The usual cause of such a change of colour in recess-printed stamps where the basic pigment is red is reaction with a chemical such as sulphur. I have seen apparent changes to shades of brown, even approaching black, in other stamps, for example the Full-Face Queen 1d red and 4d rose. This phenomenon is frequently termed "oxydisation" (though whether that is a scientifically accurate description I'm not qualified to say), and it is invariably reversible — careful treatment with hydrogen peroxide restores the original colour. In the case of Mr. Leppard's 1/-, tests have shown that this treatment has no effect whatsoever. For that reason, he suggests that this may be a previously unrecorded printing for fiscal usage. It's a nice thought, and there are actually precedents — special printings of the same George V 1/- are recorded in yellow and in red-brown for fiscal purposes. The big drawback is that stamps in these abnormal colours were invariably overprinted either 'DENOTING' or 'MORTGAGEE'S INDEMNITY FEE' in black.

Alas, therefore, in the absence of any real positive evidence, I think we have to reject the 'special printing' theory, and look for another possibility. It has been established that intense heat, for instance, will do strange things to stamp colours. Just two examples — a 6d Edward VII stamp (normally carmine) in **brown**, and a George V ½d War Stamp (normally green with black overprint) **black** with black overprint. Both were found to have passed through fires, the latter protected inside a safe. So here, I suggest, is a much more probable, and plausible, explanation for the K.G.V 1/- "sepia".

**More on Reel Joins.** It's "eat your words" time! Four months ago (N.Z. Bulletin, Nov. 1991), in discussing reel joins in general, I wrote: "As the description implies, (reel joins) are found only in stamps which were printed 'in the web' or 'on the reel' (as opposed to those printed by sheet-fed machines).

Somewhat surprisingly, that statement has gone unchallenged, for it's simply not true, I'm afraid. In at least three cases that come to mind — the 1960 Pictorial 1/- and 2/6d, and the 1962 Health 2½d + 1d — such joins exist, yet all of these stamps were, without a doubt, printed on sheet-fed machines.

So clearly, in addition to the process of joining consecutive rolls of paper to facilitate continuous production in reel-fed printing, similar joins were also sometimes made **within** a particular reel at a much earlier stage, possibly to repair a fracture during the reeling procedure at the paper mill. Equally clearly, these latter joins occasionally escaped notice both (a) when the rolls were subsequently cut up into sheets, and (b) at all subsequent stages through to the issued stamps.

Readers may care to note a small but important alteration to the telephone and fax numbers of our Head Office in Auckland, N.Z. As from Friday, 27th March, 1992, these become:

Telephone: 3793086  
Fax : 3793087

The full international prefix code (when dialling from U.K.) remains 010649 in both cases.

C.P. LOOKS BACK by Campbell Paterson  
(from C.P. Newsletter Monthly, February 1992)

People, not necessarily collectors, have quite frequently asked me how I "got into stamps".

I am not about to bore everyone about my childhood days but that's when it started — as it does with most boys. So, a conventional enough beginning at 8 years, differing only from most in that the "bug", having once bit me, never went away!

One story only remains of 1918, my first year as a collector. My father, who knew less than nothing about stamps, sought to find for me (at my insistence) something better than 1d and 2d stamps.

He was in the "Islands" fruit-trade and one night he woke me up at 10 p.m. (remember, I was only 8 years old) and showed me his find — a George V Fiji "1/- black on green". I remember to this day my tremendous joy; it was the highest value stamp I had yet seen!

I still treasure that stamp. It is the sole survivor of all the stamps I early acquired; the next oldest is a Penny Black bought in 1934. Which proves perhaps that I had a very early enthusiasm but little money for buying.

Passing on to adolescent years, I don't recall that I did much collecting until I bought my first Stanley Gibbons British Empire Catalogue. Quite a slim volume in those days, it cost as I seem to remember, five shillings! In our home (we were temporarily in Melbourne at the time), there was a postcard album from the days of the postcard craze. Everyone then collected them (for the cards, not the stamps), but it was the stamps I wanted. They were of the first ½d and 1d Great Britain George V. (Most will know the two issues I mean, they first appeared in 1910). There must have been hundreds, mostly the green ½d, and I knew from my new Catalogue that a rarity existed in that issue. It was a scarce stamp, "perf. 14 all round" as against the normal "14 x 15". Even today I find it hard to believe that in that postcard album I **did** find one of rarity!

It was a fine copy and Catalogued £6 at that time. As a footnote, I record that when I first revisited England in 1932, I sold it. Today it is catalogued at £250 but I don't regret that. It had done its task in teaching me that in stamps the "difficult" is always possible, while the "impossible" doesn't exist. What I mean by that is that 99% of stamps are never closely examined

— the “man in the street” does not know what varieties exist and even if he did, he wouldn’t expect to find them.

But the “expert” knows from his Catalogue what exists and is ready to find it in the most improbable accumulation or collection. Not only “ready” but expectant. In stamps there is an element of luck, and the man who keeps his eyes open is the one who seems to have more than his share of “luck”. Take the 1d Black I mentioned above; my new wife and I were wandering around Rotorua in that rosy cloud which is common to honeymooners. You’d think I had only one thing on my mind — and so I had! But subconsciously I became aware of two Penny Blacks in a shop window otherwise devoted to sewing machines. Even subconsciously it took me a split second to record that one was a poor example and was a “black”; the second was a beauty and was a “grey-black”. I didn’t need the rest of the split second to remember that any “grey-black” has a good chance of being from the rarest Plate No. 11. And so it was, and was I lucky! But maybe in stamps it’s not luck but knowledge that brings home the bacon.

As I hope is obvious, most of the above little story about the two 1d Blacks is in lighter vein; my ability to “read” the two stamps from six feet away was the result of my intensive study of the British early issues (1840 to 1880). Behind **that** lies an even more important phase of my life story — so more later.

---

### 1d UNIVERSAL, RESERVE PLATE (G6a)

Not a common stamp, but at present we have the finest stock of used it has ever been our pleasure to handle. ‘Reserves’ are notable for the fullness of the design, and for their range of deep, rich shades.

- |               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |               |
|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| <b>301(a)</b> | Single copy, typical of the issue, and superb used — for comparison, we’ve included an early (unworn) example from the first local plates (G5a), with which ‘Reserves’ are often confused .....                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <b>£4.00</b>  |
| <b>(b)</b>    | Set of four sumptuous shades, again finest used .....                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <b>£17.50</b> |
| <b>(c)</b>    | A similar array of four beautiful contrasts, but in <b>used pairs</b> .....                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | <b>£37.50</b> |
| <b>(d)</b>    | Incredibly, a quartet of shades in <b>used strips of three</b> . One set only available .....                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <b>£52.50</b> |
| <b>(e)</b>    | Just two shades here, but in <b>matching used blocks of six</b> .....                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <b>£50.00</b> |
| <b>(f)</b>    | Lastly, one of the standard characteristics present (albeit sometimes very faintly) on 1d Universals from the ‘ <u>London</u> ’ plate (G1a) is a minute dot immediately above the top left corner of the value tablet. Not so widely known is the fact that this same dot appears on stamps from a small area of the <u>Reserve</u> plate (Rows 1–5, Nos. 21–22). The logical explanation is that the transfer roller impression used to lay down the London plate was used — probably inadvertently — for these ten positions only on the Reserve plate, while another impression on the same transfer roller was used to lay down the rest of the plate. We offer a set of two used, one ‘Reserve’ and one ‘London’, both showing this dot clearly ..... | <b>£7.50</b>  |

|        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |         |
|--------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| (c)    | <b>As above.</b> Set of two corner blocks of four (one from top left, one from bottom left) in the same magnificent shades. Curiously, the 'carmine' is provably from Plate 1, and the 'pink' provably from Plate 2 – the Handbook implies that all 'pinks' were Plate 1, and all Plate 2 stamps were carmine! The two interesting blocks, beautiful contrasts .....                                                                                                                | £175.00 |
| (d)    | <b>As above.</b> Finest used copy .....                                                                                                                                                                                                                                                                                                                                                                                                                                             | £15.00  |
| (e)    | <b>As above.</b> Set of two, in the carmine and pink shades, fine commercially used .....                                                                                                                                                                                                                                                                                                                                                                                           | £17.50  |
| 306(a) | <b>1933 Pathway (T5a).</b> Unhinged mint copy .....                                                                                                                                                                                                                                                                                                                                                                                                                                 | £15.00  |
| (b)    | <b>As above,</b> but lightly hinged .....                                                                                                                                                                                                                                                                                                                                                                                                                                           | £8.00   |
| (c)    | <b>As above.</b> Unhinged mint block of four .....                                                                                                                                                                                                                                                                                                                                                                                                                                  | £62.50  |
| (d)    | <b>As above.</b> A brilliant top left corner block of fifteen (5 x 3), from the first 2000 sheets printed, and thus showing the prominent cloud flaws on R2/1 and 3/3 (these flaws were later retouched). R2/1 also has the constant 'LT' retouch, resulting in those letters being notably shorter than normal, and no less than ten other stamps show varieties listed in Vol. 1. The big block, lightly hinged in selvedge only, otherwise in absolutely 'as issued' condition.. | £250.00 |
| (e)    | <b>As above.</b> Top right corner block of six (2 x 3), with part sheet serial number. Includes three Vol. 1 – listed varieties. Mint unhinged .....                                                                                                                                                                                                                                                                                                                                | £95.00  |
| (f)    | <b>As above.</b> Unhinged mint pair, right-hand stamp showing the good R5/5 constant variety, variously described as the 'campsite' or 'extra pathway' ..                                                                                                                                                                                                                                                                                                                           | £32.50  |

#### 1946 PEACE 5d — MAJOR VARIETY

|        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |         |
|--------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 319(a) | An unhinged mint block of four showing the scarce Blurred Centres (S45aY). The blurring is very pronounced, all the fine detail of the ships and sea having 'run together', as if printed on very absorbent blotting paper, and results in a distinctive shade of the green colour, thus having all the classic hallmarks of a double print, one albino. Supplied with a normal block for comparison. The 'blurred centres' block, Cat. \$ 800, offered at just ..... | £200.00 |
| (b)    | A lightly hinged mint single of the same variety (with normal) .....                                                                                                                                                                                                                                                                                                                                                                                                  | £42.50  |

#### 320 'PENNY DOMINION' — REFERENCE SET

A perennially popular offer from a perennially popular issue. Our reference set consists of eight examples — one from each of the major issues listed in the C.P. Catalogue, as follows: (1) J1a — De La Rue chalky paper, upright wmk.; (2) J2a — Jones paper; (3) J3a — De La Rue thin unsurfaced paper; (4) J4a — De La Rue chalky paper, sideways wmk.; (5) J5a — 'Art' paper, imitation (litho) wmk.; (6) J6a — Cowan paper, normal wmk.; (7) J7a — Cowan Paper, reversed wmk.; (8) J8a — Wiggins Teape paper.

|--------------------------------------------------------------|--------|
| The reference set of eight 1d Dominions, unhinged mint ..... | £52.50 |
| OR lightly hinged mint .....                                 | £30.00 |

#### 321 COWAN PAPER, REVERSED WATERMARK

This paper was, according to some sources, in the nature of a deliberate trial, while others take the view that it resulted quite fortuitously through application of the chalk surfacing to the wrong side of the paper in error. Either way, it produced distinctive varieties of several issues which do not rate even a mention in most catalogues. In addition to the above-mentioned J7a, three other contemporary definitives were printed on this paper — King George V ½d (K13g), 1d (K15c) and 2d (K18f). We can offer the unusual set of four (incl. J7a), all with wmk. reversed, unhinged mint .....

£42.50

Those clients ordering the 1d Dominion reference set (which already includes J7a, of course) can have the remaining three 'reversed watermarks' at .....
